

WE CLAIM:

- Sub
A1
1. A method for replicating information, comprising:
receiving a manifest of modifications to a data store;
comparing the manifest of modifications to a list of objects within a mobile data store; and
if a particular modification identified in the manifest relates to an object not on the list of objects within the mobile data store, altering the manifest to reflect that the particular modification is associated with an add event for the object not on the list of objects.
 2. The method of claim 1, further comprising passing the altered manifest including the add event to a mobile device on which resides the mobile data store.
 3. The method of claim 2, wherein the altered manifest includes modifications that describe add events, change events, and delete events.
 4. The method of claim 3, wherein the add events, change events, and delete events describe actions to be performed on objects that reside in the mobile data store.
 5. The method of claim 1, wherein the manifest, prior to being altered, does not contain a modification that describes an add event, and wherein the altered manifest contains at least one modification that describes an add event.
 6. The method of claim 1, wherein the manifest is created in accordance with a Document Authoring and Versioning (DAV) protocol.
 7. The method of claim 6, wherein the altered manifest is no longer consistent with the DAV protocol.
